British Cosmetics (Pvt) Ltd

Creative Director

Sri Lanka
2020-2024

- Visual Content Creation: Successfully conceptualized and designed a wide range of visual assets, including digital graphics, social media content, print materials, presentations, and more. This has strengthened my ability to tailor designs to specific audiences and platforms. Advertising, Posters, Signages, Branding & Printing, Designing the web banners & posts for the website, Photo shooting the products to the website.
- Print and Digital Expertise: Created print-ready materials such as brochures, flyers, posters & product labeling along with digital assets like web banners and email templates. This versatility has enabled me to cater to a wide range of marketing and promotional needs.
- Project requirements and priorities while consistently delivering high-quality designs. My experience as a Creative Designer reflects a deep passion for design, a dedication to delivering exceptional work, and a commitment to continuous learning within the ever-evolving field of graphic design. I look forward to leveraging my expertise to contribute positively to creative endeavors and drive visual excellence.
- Compliance Information & Legal Review: Finalizing the label design, ensuring that it complies with relevant laws and regulations governing labeling, packaging, and advertising of the product. Ensure that the label includes all necessary information required by regulations and standards in the product's market. This may include product name, ingredients, nutritional information, expiration date, instructions for use, warnings, and any legal disclaimers.
- Materials and Finishes: Consider the substrate and printing techniques used for the label, as well as any special finishes or embellishments such as embossing, foiling, or spot varnishes. These elements can add texture and tactile interest to the label design.
- Testing the label design with focus groups or target consumers to gather feedback on its effectiveness and appeal. Iterate on the design based on feedback received to optimize its impact.
- Develop visual identities, including logos, color palettes, and typography, that represent a brand's personality and values consistently across different platforms and materials.
- Web Design, Wireframing and Prototyping: create wireframes or prototypes to outline the layout, structure, and functionality of the website. This helps visualize the site's organization and navigation flow before moving on to the visual design phase.

- **Print and Digital Expertise:** Created print-ready materials such as brochures, flyers, posters & product labeling along with digital assets like web banners and email templates. This versatility has enabled me to cater to a wide range of marketing and promotional needs.
- **Digital Expertise:** Created print-ready materials such as brochures, flyers, and posters, along with digital assets like web banners and email templates. This versatility has enabled me to cater to a wide range of marketing and promotional needs. **Typography and Layout:** Applied a keen understanding of design principles, color theory, typography, and layout to produce designs that are visually appealing and enhance user experience.
- **Created brand identity,** and desired features for the website, mobile apps, social media, email marketing, and digital advertising, optimizing designs for online viewing and interactivity.
- **Graphics and Imagery:** Incorporate graphics, illustrations, or images that enhance the label's visual appeal and communicate key messages or benefits of the product. Ensure that any images used are high-quality to the product.
- **Managed multiple projects simultaneously,** prioritize tasks, and meet deadlines while ensuring the quality and consistency of deliverables.
- **Collaboration and Feedback:** Worked closely with other members of the creative team, including art directors, copywriters, and marketing professionals, to brainstorm ideas, gather feedback, and refine designs based on client or stakeholder input.
